Writeable Board Care Advice	<p>Writeable boards consist of a melamine surface laminated onto a wooden substrate. For optimal performance and longevity of your writeable board, we recommend using high-quality whiteboard markers, solvents, and cleaners specifically designed for melamine surfaces.</p> <p>Due to the natural characteristics of the wood substrate, the writeable board may occasionally exhibit minor imperfections or experience slight discolouration over time. These variations are considered normal and do not indicate a manufacturing defect.</p>
