FEATURES

Freestanding, lightweight partitions for flexible space division

AudioArt Brick Whisper Wall is a freestanding, lightweight partition system designed for flexible space division. It is made of 9mm thick, lightweight panels that are easy to install and remove. The system is available in four different tri-colour schemes: Elements, Waterholes, Country, and Listening. Each scheme consists of a base colour, an accent colour, and a marle colour. The system is also available in a singular colour. The panels are made of a lightweight material that is easy to handle and install. The system is designed to be freestanding, so it can be moved and reconfigured as needed. It is a great solution for creating flexible space divisions in offices, homes, and other commercial spaces.
